## **AMENDMENTS TO THE CLAIMS**

This listing of the claims replaces all prior listings and versions:

1 to 25. (canceled).

26. (currently amended): An expression cassette comprising

a promoter operably linked to a nucleic acid molecule which, when transcribed *in vivo*, forms double stranded RNA <u>via self-complementing sequences within the RNA</u>, wherein the <u>double stranded RNA</u> that induces the production of interferon, and

an RNA polymerase II promoter operably linked to a nucleic acid molecule that encodes an antigen from a pathogenic agent.

- 27. (canceled).
- 28. (previously presented): The expression cassette according to claim 26 wherein said antigen is a viral antigen.
- 29. (original): The expression cassette according to claim 28 wherein said viral antigen is selected from the group consisting of HIV, HSV, HBV, HCV, HPV, and FIV.
- 30. (previously presented): The expression cassette according to claim 26 wherein said pathogenic agent is a bacteria, parasite or fungus.
- 31. (previously presented): The expression cassette according to claim 26 wherein said pathogenic agent is a tumor.
  - 32. (canceled).
- 33. (original): The expression cassette according to claim 26 wherein said pol II promoter is selected from the group consisting of CMV, SV40, MoMLV LTR and RSV LTR.

- 34. (previously presented): A gene delivery vector, comprising an expression cassette according to claim 26.
- 35. (original): The gene delivery vector according to claim 34 where said vector is a plasmid.
- 36. (original): The gene delivery vector according to claim 34 where said vector is a recombinant retrovirus.
- 37. (original): The gene delivery vector according to claim 34 where said vector is a recombinant herpesvirus.
- 38. (original): The gene delivery vector according to claim 34 where said vector is a recombinant poxvirus.
- 39. (original): The gene delivery vector according to claim 34 where said vector is a recombinant adenovirus.
- 40. (original): The gene delivery vector according to claim 34 where said vector is a recombinant parvovirus.
- 41. (original): The gene delivery vector according to claim 34 where said vector is a recombinant alphavirus.
- 42. (original): The gene delivery vector according to claim 34 where said vector is a recombinant polyoma virus.
- 43. (previously presented): The gene delivery vector according to claim 34 where said vector is a eukaryotic layered vector initiation system vector.

- 44. (previously presented): A cell which contains a gene delivery vector according to claim 34.
  - 45. (canceled).
